

SMART
SOLUTION

DISINFECTANTS

We are **SMART SOLUTION**

As a manufacturer and distributor of top-quality hygiene and disinfection products, we know that during the exposure to epidemiological risk safety is a matter of particular importance. By responding to new needs, we give our partners not only the opportunity to fully adapt to governmental regulations but also the chance to maintain business continuity.

Necessary certificates and independent tests of MEDOSEPT+ products are a guarantee confirming their highest effectiveness and safety, which has already been appreciated by our partners from Poland and Germany.

Why is that worth it?

Continuity of operation

The ability to adapt the premises to governmental regulations provides an opportunity to maintain continuity of operation. Responsible action combined with the use of top-quality disinfectants effectively minimizes the risk of closure due to the virus.

Strengthening the image of the responsible employer

Creating a risk-free space gives customers and employees a sense of security and increases their comfort. The provision of personal protective equipment ensures that the highest standard of hygiene is maintained and builds a picture of a responsible and predictable employer.

Maintaining the highest safety standard

The use of safety measures with a WHO-recommended alcohol content of 70% effectively reduces the risk of infection. The health and safety of employees constitute the basis of a well-run company.

Savings resulting from an attractive price

Thanks to omitting intermediate distribution points we guarantee an attractive price to our partners. Also, as a direct manufacturer, we ensure the continuity of supply, which reduces to a minimum the risk of disruption of the facility operation due to the lack of safety.

Maintaining aesthetic standards

We allow our partners to put any kind of label on the packaging. The use of products that are visually customised to the aesthetic standards adopted in the facility allows maintaining a consistent image of the entire brand.

Hand Disinfection Gel

Antibacterial gel for hygienic hand disinfection. Personal protective equipment, one of the key elements of preventive actions while the risk of infection is present.

Key features:

- no water is needed
- gentle on the hands
- contains glycerol to soothe skin irritations
- effectiveness proven by tests
- pleasant delicate fragrance

Hand and surface disinfectant

An effective hand and surface disinfectant with a bacterial and virucidal effect. The alcohol content of 70% corresponds to government and WHO recommendations.

Key features:

- effectively disinfects cleaned surfaces and hands
- gentle on the hands
- effectiveness proven by tests
- pleasant delicate fragrance

Green surface cleaner

Ecological surface cleaner with disinfecting, antiseptic, bactericidal, virucidal and fungicidal properties. It effectively disinfects sanitary fittings, also in the SPA or in the pool.

Key features:

- for all surfaces (including those in contact with food)
- neutralises odours of organic origin
- biodegradable
